**RESPONSE TO THE INVITATION TO CORRECT DEFECTS  
IN THE INTERNATIONAL APPLICATION**

Dear Sir or Madam:

In response to the Invitation to Correct Defects in the International Application mailed on 22 June 2004, enclosed please find new drawings (20 sheets, numbered 1/20 through 20/20).

It is also submitted that the substitute sheets of drawings correct the defect in the International Application as specified in Annex C1.

Respectfully submitted,

Michael B. Atlass  
Attorney for Applicant  
Registration No. 30,606

### Figure 6

The screenshot displays a Windows XP desktop environment. A file explorer window titled "Application Assets" is open, showing a directory structure. The left pane shows a tree view with folders like "config", "data", and "logs". The right pane shows the contents of the selected folder, which appears to be "data". Below the file explorer, a command prompt window is open, showing the execution of a command to list files in a directory. The command prompt shows the execution of a command to list files in a directory, with the output showing a list of files and their sizes. The desktop background is a standard Windows XP wallpaper. The taskbar at the bottom shows the "Start" button and several open applications, including "Application Assets", "cmd", and "Recycle Bin".
